

CoverMyMeds Helps Reduce the PA Burden and Improve Time to Therapy

CoverMyMeds automatically prompts you to initiate a prior authorization (PA) request upon claim rejection within the PrimeRx™ workflow.

HOW IT WORKS

STEP 1

At the point of claim rejection, the pharmacy staff follows their normal process to resolve the claim outside of the PA process.

STEP 2

If the rejection is unable to be resolved, the pharmacy staff clicks "Start PA" within PrimeRx.

STEP 3

The prescriber is then notified of the rejection and resolution options.

BENEFITS

Works for any medication and all plans, including Medicare Part D and Medicaid

Helps return faster determinations and increase customer satisfaction

Flexibility for workflow customizations specific to pharmacy needs

Available at no cost to pharmacists and their staff
